Quietus is an) AOE AWAY RAID explosion that provides voidwalker with a fan of stackable days. Each individual player must quickly pair with another player who has the opposite color. Visually, you can also see objects floating from the sky into each puddle, as well as meteor target. Like all stack markers, the party should be grouped together to help soak the aggregates with the)n. Do not forget that the aggregates will be summoned at the end of each beam. At this point, Voidwalker will now travel between the cycle of the chaos or the retribution cycle. Dark Fire III will score four random players with a large pürpura Cryculo with which he may be familiar from normal mode. In addition, the eye of the shadow will be executed, forcing all the unmarked players to look away from the affected player while dealing with the superimposed mechanic. This is a chain of large amount of cure events, so be sure to use as much mitigation and healing possible. If Voidwalker projects the retribution cycle, players must be prepared for a doomvoid slicer, doomvoid blade and guillotine doomvoid in that order. The phases and capacities of Voidwalker, the Doomvoid blade is aimed at all participants and exploit them with a cone attack by means. At the same time, the wind of hell will come into force, which will reduce players marked at 1 HP and make it impossible for them to soak a pool until they have healed. Impiate darkness places a stack marker in a random participant. Remember: if you see the dark purple attachment, muleve near the hand or use the immunity of the crisis. Once the flash of proximity and shadow eye markers have been executed, the previously marked players must return to the center of the sand, giving players marked by the dark space of Dark Fire III enough to extend and avoid cutting up the Group with its next explosions of AOE. The doomvoid blade will unleash little after equilibrium, which will give players a small window of time to spread around the boss in a circle and avoid cutting other players with the next line lies. Do not forget that the blade will deploy adds at the end of each beam that will move towards where the beam was fired. entropÄa is an ³ incidental incursiÄ ³ an inevitable incursiÄ (as seen in normal mode).
